These Trains will NOT stop en route.

It is essential that these services be punctual, and particular care must be taken to have the line clear for them.

It is 1.490 km from Ipswich to Workshops South Gate, and 1.843 km from Ipswich to Stop Blocks near Main Gate.

The Section Ipswich-Workshops is laid with 21 kg or lighter rails.

### TELEPHONES — ELECTRIC SIGNALS

In connection with the working of electric signals, telephones are provided on or near the signals listed below. These telephones enable trainmen to communicate with either the train controller or the signalman in the event of a delay to a train or any other emergency.

Within the electrified area from Ferny Grove to Ipswich, including the Exhibition line, and from Corinda to Moolabin, telephones on signals in automatic sections allow communication with the train controller. However, telephones on signals that are controlled by a signal cabin allow communication with the controlling cabin. Should the signal cabin be cut out, these telephones will then allow communication with the train controller.

Within the following electrified areas, all telephones on signals allow communication with the signalmen at Mayne Control Centre:—

- South Brisbane to Beenleigh including Yeerongpilly to Moolabin
- Mayne to Shorncliffe
- Northgate to Caboolture
- Dutton Park to Cleveland

Outside the electrified area, all telephones on signals are connected through to the train controller.
